DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 54,56,57,59,61,62,64,66 and 67 are rejected under 35 U.S.C. 102(e) as being anticipated by James et al.

James et al. teaches a polishing pad, 10, with a center area, a first set of grooves, 20, having a first depth, width and density, an edge area with a second set of grooves, 18, having a second depth, width and density. James et al. also teaches that the first and second depths are within the range of approximately 1-90 % of the pad thickness, and the first and second widths are within a range of approximately 1-100 mils, and the first and second densities are within a range of 2-50 grooves/inch.

Allowable Subject Matter

3. Claims 55,58,60,63 and 65 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed 1/16/01 have been fully considered but they are not persuasive.

The applicant argues that the James et al. reference does not contain the differences between the grooves in the center area and the grooves in the edge area. The examiner disagrees, because the James et al. reference does teach a polishing pad having a center area and an edge area containing grooves with different depths, widths and densities, as claimed.

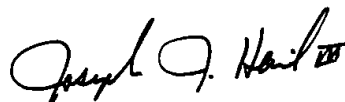

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
